

Energy performance certificate (EPC)

| | | |
|---|--|------------------------|
| 67, Tievecrom Road Forkhill NEWRY BT35 9RX | | Energy rating E |
| Valid until 21 February 2028 | Certificate number 0878-2902-0829-9128-6175 | |

Property type
Detached bungalow

Total floor area
159 square metres

Energy efficiency rating for this property

This property’s current energy rating is E. It has the potential to be D.

[See how to improve this property’s energy performance.](#)

The graph shows this property’s current and potential energy efficiency.

Properties are given a rating from A (most efficient) to G (least efficient).

Properties are also given a score. The higher the number the lower your fuel bills are likely to be.

For properties in Northern Ireland:

- the average energy rating is D
- the average energy score is 60

Breakdown of property’s energy performance

This section shows the energy performance for features of this property. The assessment does not consider the condition of a feature and how well it is working.

Each feature is assessed as one of the following:

- very good (most efficient)
- good
- average
- poor
- very poor (least efficient)

When the description says “assumed”, it means that the feature could not be inspected and an assumption has been made based on the property’s age and type.

| Feature | Description | Rating |
|---------|---|---------|
| Wall | Timber frame, as built, insulated (assumed) | Good |
| Wall | Cavity wall, as built, insulated (assumed) | Good |
| Roof | Pitched, 100 mm loft insulation | Average |

| Feature | Description | Rating |
|----------------------|--|-----------|
| Window | Fully double glazed | Average |
| Main heating | Boiler and radiators, oil | Poor |
| Main heating control | Programmer and room thermostat | Average |
| Hot water | From main system, no cylinder thermostat | Very poor |
| Lighting | No low energy lighting | Very poor |
| Floor | Solid, insulated (assumed) | N/A |
| Secondary heating | Room heaters, dual fuel (mineral and wood) | N/A |

Primary energy use

The primary energy use for this property per year is 262 kilowatt hours per square metre (kWh/m²).

► [What is primary energy use?](#)

Environmental impact of this property

One of the biggest contributors to climate change is carbon dioxide (CO₂). The energy used for heating, lighting and power in our homes produces over a quarter of the UK's CO₂ emissions.

An average household produces

6 tonnes of CO₂

This property produces

11.0 tonnes of CO₂

This property's potential production

6.8 tonnes of CO₂

By making the [recommended changes](#), you could reduce this property's CO₂ emissions by 4.2 tonnes per year. This will help to protect the environment.

Environmental impact ratings are based on assumptions about average occupancy and energy use. They may not reflect how energy is consumed by the people living at the property.

How to improve this property's energy performance

Making any of the recommended changes will improve this property's energy efficiency.

If you make all of the recommended changes, this will improve the property's energy rating and score from E (45) to D (65).

► [What is an energy rating?](#)

Recommendation 1: Increase loft insulation to 270 mm

Increase loft insulation to 270 mm

Typical installation cost

£100 - £350

Typical yearly saving

£113

Potential rating after carrying out recommendation 1

49 | E

Recommendation 2: Low energy lighting

Low energy lighting

Typical installation cost

£70

Typical yearly saving

£69

Potential rating after carrying out recommendations 1 and 2

51 | E

Recommendation 3: Hot water cylinder thermostat

Hot water cylinder thermostat

Typical installation cost

£200 - £400

Typical yearly saving

£85

Potential rating after carrying out recommendations 1 to 3

55 | D

Recommendation 4: Heating controls (thermostatic radiator valves)

Heating controls (TRVs)

Typical installation cost

£350 - £450

Typical yearly saving

£60

Potential rating after carrying out recommendations 1 to 4

57 | D

Recommendation 5: Replace boiler with new condensing boiler

Condensing boiler

Typical installation cost

£2,200 - £3,000

Typical yearly saving

£200

Potential rating after carrying out recommendations 1 to 5

65 | D

Recommendation 6: Solar water heating

Solar water heating

Typical installation cost

£4,000 - £6,000

Typical yearly saving

£36

Potential rating after carrying out recommendations 1 to 6

67 | D

Recommendation 7: Solar photovoltaic panels, 2.5 kWp

Solar photovoltaic panels

Typical installation cost

£5,000 - £8,000

Typical yearly saving

£274

Potential rating after carrying out recommendations 1 to 7

73 | C

Recommendation 8: Wind turbine

Wind turbine

Typical installation cost

£15,000 - £25,000

Typical yearly saving

£576

Potential rating after carrying out recommendations 1 to 8

87 | B

Paying for energy improvements

[Find energy grants and ways to save energy in your home. \(https://www.gov.uk/improve-energy-efficiency\)](https://www.gov.uk/improve-energy-efficiency)

Estimated energy use and potential savings

Estimated yearly energy cost for this property

Potential saving

£529

The estimated cost shows how much the average household would spend in this property for heating, lighting and hot water. It is not based on how energy is used by the people living at the property.

The estimated saving is based on making all of the recommendations in [how to improve this property's energy performance](#).

Heating use in this property

Heating a property usually makes up the majority of energy costs.

Potential energy savings by installing insulation

The assessor did not find any opportunities to save energy by installing insulation in this property.

Contacting the assessor and accreditation scheme

This EPC was created by a qualified energy assessor.

If you are unhappy about your property's energy assessment or certificate, you can complain to the assessor directly.

If you are still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation schemes are appointed by the government to ensure that assessors are qualified to carry out EPC assessments.
